

# Goodbye paper, hello digital.

## **Facilitating exhibit sharing, storage and management has never been easier.**

InstantExhibit+™ provides a secure online repository for parties to upload exhibits electronically both before and during depositions, in addition to maintaining a central digital collection of exhibits for ongoing complex, document-intensive matters.

Whether participants are in the same room or remote, everyone has centralized access to view and examine introduced exhibits. This alleviates excess paper, promotes organization and provides realtime access to exhibits for all parties.

- ⊙ 24/7 online access
- ⊙ Unlimited parties and users
- ⊙ Private folders with restricted access
- ⊙ Shared folders to view introduced exhibits
- ⊙ Master exhibit binder updated and maintained by a dedicated team for the duration of your case
- ⊙ Compatible with all file types and individual file sizes up to 5 GB
- ⊙ Industry-leading security and compliance
- ⊙ Deposition technician upon request to assist with exhibit introduction, annotating and more

## How it Works

InstantExhibit+™ is an easy-to-use, web-based platform that provides all parties an easy way to manage discovery, stay organized and collaborate both internally and externally. Here's how to leverage our services before, during and after your deposition.

**Before the Deposition** Each party has access to private exhibit folders where you can upload potential exhibits prior to or during the deposition. Private folders are protected with restricted controls, allowing only designated members of your team access to upload, download and view the contents.

**During the Deposition** Every deposition will have a shared exhibit folder for all parties to view exhibits introduced during the deposition. To introduce an exhibit during a deposition, simply copy the exhibit from your private folder into the shared folder to make it available to all parties in realtime.

**After the Deposition** Parties have ongoing access to all introduced exhibits for the duration of the case. View previously introduced exhibits within their individual shared exhibit folders or within the master exhibit binder.

## Industry-Leading Security and Compliance

Safeguarding your sensitive case and client data is our priority. Our platform features advanced security and threat protection, including:

Built-in controls and granular permissions

Two-factor authentication

File encryption

HIPAA & PHI compliance

## Remote Depositions Made Easy

We recommend using our remote deposition platform, RemoteDepo™, with InstantExhibit+™ for a comprehensive virtual deposition solution.

RemoteDepo™ allows everyone to participate in a remote deposition and interact as if they were in the same conference room. Communicate in realtime, observe witness body language and seamlessly facilitate questioning. With features and functionality to mimic in-person proceedings, RemoteDepo™ lets you perform on-screen annotations, share screens, establish private breakout rooms and view a realtime feed of the court reporter's transcript.

On-demand access to **12,000+** offices in over **2,700** cities across the country

More than **5,000** independent court reporting professionals with specialized areas of expertise

Complex case management

State-of-the-art technical capabilities and infrastructure

Remote and local text streaming

Legal videography

Interpreting services

Client Portal with **24/7** online access to calendar, transcripts, invoices and more

“ Having now completed multiple remote depositions, I have been very happy with the experience. The transition to remote depositions in a very large and document intensive multi-party litigation was a concern, but we have had no issues in our case. Thanks to the U.S. Legal Support team providing training and support, the transition from in-person depositions has been much easier and more effective than I expected. ”

**DOMINGO T.**
