

Seamless Trial Logistics, Technology, and Support

Concentrate on the case, not the coordination.

The right support behind the scenes keeps an elite trial team at full strength. Trial logistics, technology, and support services from TrialQuest absorb the demands that would otherwise pull teams away from the work that matters. From pre-trial setup to in-court technical support, our regional teams with local knowledge can manage the non-legal work that makes strong legal outcomes possible. With three decades of litigation support experience, TrialQuest serves as a single partner, seamlessly coordinating every detail behind the scenes, rather than managing through multiple vendors.

War Room Support

Keep your trial team focused on case strategy and execution with a fully equipped war room designed to support collaboration, productivity, and trial readiness from day one.

- Complete war room buildout, sourcing & setup
- Secure networking & technology
- Scalable to fit any case
- Rapid deployment for compressed timelines

Dedicated IT & Network Support

Our IT specialists design and deploy secure wired and wireless networks built to your firm's exact standards to keep your trial connected.

- Dedicated technician support
- Configured to firm-specific protocols
- Collaboration with in-house IT teams

Trial Logistics

Keep your trial on track with professional transport and logistics support that delivers your exhibits and trial materials exactly where and when they are needed.

- Dependable & secure transport
- Courthouse delivery, pickup & return coordination
- End-to-end logistics management for trial materials

White-Glove Concierge & Errands

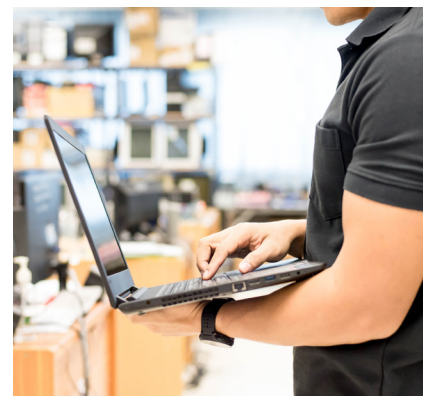

Eliminate the distractions that take attention away from the case with our concierge service that handles dry cleaning, errands, and the daily demands of trial.

- Dedicated team member
- Covers day-to-day errands
- Frees up time for case strategy

Trial Technology & Equipment Rental

Present your case with confidence using courtroom technology and equipment, tested and managed by our dedicated technicians to perform when it matters most.

- Full range of equipment
- Customizable and scalable for your case
- Real-time technical support
